

## Greenbacker Renewable Energy Company Partners with Equal Earth, Inc. to Fund \$50 Million Worth of Solar Projects

Greenbacker Renewable Energy Company announced today that it has partnered with Equal Earth, Inc. to provide up to \$50 million to finance solar energy projects. Equal Earth will use the capital to fund solar power purchase agreements for businesses, utilities and non-profit organizations.

Greenbacker Renewable Energy Company, a New York based, externally managed energy company focused on the renewable energy sector, funds a wide variety of renewable energy assets. "Equal Earth is an ideal partner for us. They combine deep industry experience with a scalable business model and we expect to rapidly deploy this capital with them," added Charles Wheeler, CEO of Greenbacker Renewable Energy Company.

"Equal Earth has a very aggressive growth plan and this \$50 million is the catalyst for further expansion," stated Equal Earth Chairman, President and CEO Andrew Duggan. "We are happy to team up with Greenbacker to create more opportunities for the public to access affordable, clean power," added Duggan.

Greenbacker seeks to provide developers, corporations, government agencies and others with the resources to build projects that will save money, create jobs and limit greenhouse gases, and to make investments that generate significant and dependable cash flows and deliver attractive risk-adjusted returns over time to investors.

### ABOUT GREENBACKER RENEWABLE ENERGY COMPANY

to acquire and monitor a diversified portfolio of income-producing renewable energy power plants, energy efficiency projects and other sustainable development investments. Renewable power plants use established technologies to convert the energy from natural resources—the sun, wind, moving water, and geothermal heat—into electricity. Electricity is then typically sold to creditworthy entities such as businesses, utilities and/or governments via long-term contracts. Unlike traditional power plants, renewable energy power plants are typically not subject to the changing global markets for oil, coal, and natural gas, nor do they require the acquisition of these raw materials to create electricity.
