## Important Risk Information

**Investors should carefully consider the investment objectives, risks, charges and expenses of the Fund. This and other important information about the Fund is contained in the prospectus, which can be obtained by contacting your financial advisor or visiting [www.sierratotalreturnfund.com](http://www.sierratotalreturnfund.com). The prospectus should be read carefully before investing.**

Investing in the Fund involves risks, including, but not limited to, the risk that you may receive little or no return on your investment or that you may lose part or all of your investment. The ability of the Fund to achieve its investment objective depends, in part, on the ability of its investment adviser to effectively allocate the assets of the Fund among the various securities and investments in which the Fund invests. There can be no assurance that the actual allocations will be effective in achieving the Fund's investment objective or delivering positive returns. Investment return and principal value of an investment will fluctuate, and an investor's shares, when redeemed, may be worth more or less than their original cost. Alternative investment funds, ETFs, interval funds, and closed-end funds, in which the Fund may invest, are subject to management and other expenses, which will be indirectly paid by the Fund. Preferred securities are subject to credit risk and interest rate risk. Convertible securities are typically issued as bonds, debentures, notes, or preferred shares with the option to convert into or exchanged for a specified amount of common stock. As a result, convertible securities are hybrids that have characteristics of both bonds and common stocks and are subject to risks associated with both debt securities and equity securities. Issuers of debt securities may not make scheduled interest and principal payments, resulting in losses to the Fund. Typically, a rise in interest rates causes a decline in the value of fixed-income securities. The use of leverage, such as borrowing money to purchase securities, will cause the Fund to incur additional expenses and magnify the Fund's gains or losses.

The distribution rate illustrated is based off the first quarter 2018 distribution of \$0.3258 per share and the Fund's NAV of \$24.82 per share as of 3/31/18. Distributions are not guaranteed and are subject to change without notice. Distribution is an annual distribution paid quarterly. Distributions are not guaranteed and are made at the discretion of the Board of Trustees and will depend on the Fund's earnings, financial condition, maintenance of our regulated investment company ("RIC") tax treatment and other factors the Fund's Board of Trustees may deem relevant. While distributions for the aforementioned period were funded entirely through ordinary income, it should be noted that a portion of distributions may consist of a return of capital and other non-income items such as loan proceeds or borrowings in the future. Therefore, shareholders should not assume that the source of a distributions will always be from the Fund's net profit. In addition, Class T, Class I and Class L shares are subject to an ongoing distribution fee (0.75%, 0.50% and 0.25%, respectively); and Class T and Class L shares are subject to upfront sales load (2.00% and 4.25% respectively), all of which can impact the amount of distributions paid to investors.

There currently is no secondary market for the Fund's shares and the Fund expects that no secondary market will develop. Limited liquidity is expected to be provided to shareholders only through the Fund's quarterly repurchase offers, regardless of how the Fund performs. The Fund is an interval fund and, as such, has adopted a fundamental policy to make one repurchase offer of each class of outstanding shares at the net asset value or NAV of that class of shares per year. In addition to this mandatory repurchase offer, the Fund intends to make three additional repurchase offers in each year. Investments in lesser-known, small and medium capitalization companies may be more vulnerable than larger, more established organizations. The Fund's investments may be negatively affected by the broad investment environment and capital markets in which the Fund invests, including the real estate market, the debt market and/or the equity securities market. The value of the Fund's investments will increase or decrease based on changes in the prices of the investments that it holds. This will cause the value of the Fund's shares to increase or decrease. The Fund is "non-diversified" under the Investment Company Act of 1940, as amended, since changes in the financial condition or market value of a single issuer may cause a greater fluctuation in the Fund's net asset value than in a "diversified" fund. The Fund is not intended to be a complete investment program.
